Overview

Adtran's 8600 Series Service Delivery Gateways (SDGs) build upon the successes of their predecessors, enabling even higher speed services and increased Wi-Fi service reach, with better than ever, class-leading subscriber experience enhancements.

Carrier-class multigigabit ready

The SDG 8632 is a carrier-class, tri-band Wi-Fi 6E (802.11ax) residential gateway with a 2.5GbE WAN port, 6GHz band and 160MHz channels support, making it ideal for 2+Gbit/s whole-home coverage to homes and small businesses. With three 4x4 radios (one each in the 2.4GHz, 5GHz and 6GHz bands), the SDG 8632 works as a primary gateway or mesh satellite, delivering up to 8.4Gbit/s aggregate throughput. Now, you can support hundreds of smart-home devices and bandwidth-intensive gaming, streaming, AR/VR, and remote working applications for multiple users in the home or business. The SDG 8632 also supports multigigabit on the LAN with a 2.5GbE Ethernet port for multigigabit wired connections.

Powerful yet power-efficient

With advanced ARM multicore processors, the SDG 8632 boasts 4x more processing power to support multiple 4K streams, low latency gaming applications, and innovative revenue-boosting smart home apps. Intelligent power management, power-efficient 12nm processors, and the use of recyclable materials ensure a sustainable, environmentally friendly Wi-Fi solution. In addition, the elegant, compact design with USB-C powering allows placement on a desk, bookshelf, or tabletop to deliver exceptional Wi-Fi experiences to all users.

Open platforms unlock innovation

The Adtran Residential Wi-Fi solutions, including 800 and 8600 Series SDGs, provide operators a choice of market-leading open-source platforms. We support both Intellifi and Plume platforms allowing you to deliver the right cloud-managed Wi-Fi solution customized to your market and business needs. In addition, we support TR-069 enabling remote management of the SDGs.
